

Urine Analyzer

Accurine-514

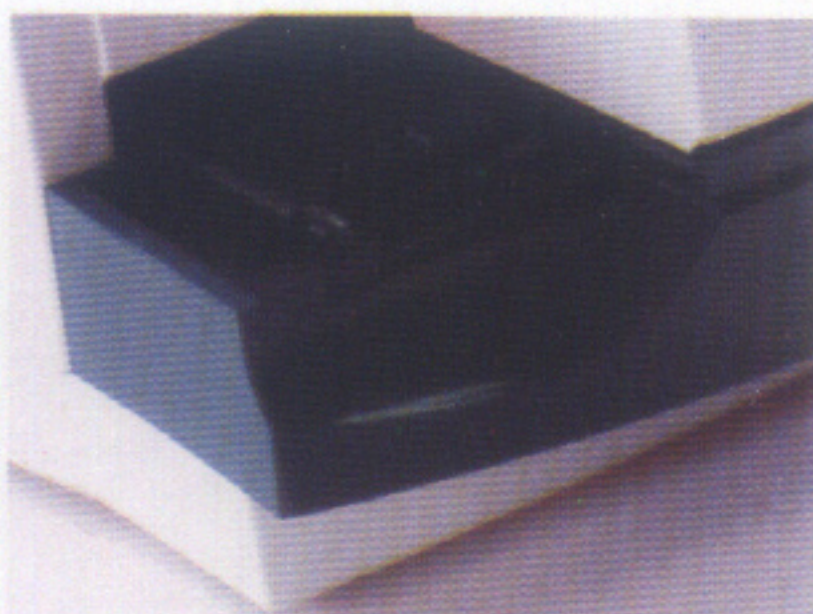

Accustar Diagnostic Instruments & Reagents

PRODUCT PROFILE

Accurine 514 Urine Analyzer

Product Characteristics :

- Adopting the advanced high luminosity cold light source with 4-wavelength, which improves the sensitivity, accuracy, specificity, and reduces the interference from ambient light
- High test speed, 514 strips/hr, 11 parameters test can be finished within 7 seconds
- Automatically rectify the test results influenced by non-specificity, pH, specific gravity, and color
- Automatically detecting the ready-to-test strips, easy operation
- Built-in thermal printer with high speed and low noise; External stylus printer
- Connectable with external barcode reader
- Connectable with urine sediment analyzer
- Users can set an abnormal value flag by themselves
- International, Regular and Symbol system units available for option
- With waste urine collecting system

Technical Specifications :

- Test items : urobilinogen, bilirubin, ketone, blood, protein, nitrite, leukocytes, glucose, specific gravity, pH and Vit. C (or microalbumin)
- Test wavelength : 525nm, 572nm, 610nm, 660nm
- Test principle : Photoelectric colorimetry
- Suitable strips : P 8, P10 and P11 urinalysis strips
- Test throughput : 514 strips/hr
- Data memory : 2000 patient results
- Computer interface : RS-232 port parallel printer interface
- Display : 240x64 dot-matrix LCD
- Power supply : 100-240VAC, 50Hz/60Hz
- Power : 40VA
- Dimensions : 380mmx378mmx275mm
- Weight : 6.5kg
- Printer : Built-in thermal printer

Certified to
ISO 9001:2000 & ISO 13485:2003
